The unknown factor when buying a vehicle is what it will be worth at trade-in. Accidents, repair quality, and market conditions can all reduce value.

What Impacts Your Vehicle's Value?

Total Loss: Insurance may not cover the full loan payoff.

Collision Repair: Diminished value, especially with non-factory parts.

Aftermarket Parts: Many insurers won't pay for OEM parts after one year.

Market Conditions: Trade-in values fluctuate due to multiple factors.

Our **Asset Guard+** program provides you with financial protection when accidents occur.

We all know to keep a vehicles value high we need to do its scheduled maintenance, keep the interior clean, change oil and fluids, rotate tires and change belts to ensure the vehicle is still performing well!
